Education

University of Agriculture, Faisalabad

Faisalabad, Pakistan

Bachelor of Science in Computer Science, CGPA 3.526/4.00

September 2022 - September 2026

Technical Skills

Languages: C++, Python, JavaScript
Web-Skills: WordPress, HTML, CSS, Bootstrap, Web Scrapping
Tools/IDE: Visual Studio, PyCharm, Google Collab
Open Source: Git, GitHub
Database: MySQL
Interests: Data Science, Deep Learning, Generative AI

International Hackathons

LEAP 2024 Hackathon ([view details](#))

Remote

Healthcare AI Engineer

March 2024 - March 2024

Tools: Python, TensorFlow, OpenCV

- Developed the Wellness Nexus application to help individuals manage health and fitness.
- Created Nexus-Scan, utilizing computer vision to analyze food images and estimate calorie intake.
- Implemented Nexus-Sugar for predicting sugar content in food, aiding dietary management for conditions like diabetes.
- Developed Nexus-Fit for ideal weight range calculations and progress tracking.
- Integrated Nexus-Bot, a virtual assistant for app navigation and user guidance.

Hello GPT-4o AI ([view details](#))

Remote

AI Marketing Campaign Agent

June 2024 - June 2024

Tools: Python, OpenAI, Azure

- Developed an AI-powered chatbot to automate marketing campaigns.
- Integrated Natural Language Processing (NLP) for user interaction to specify campaign needs.
- Used OpenAI models to generate creative text and images for marketing content.
- Automated scheduling and publishing on social media platforms via Business Suite.
- Generated monthly marketing strategies and detailed PDF proposals for client approval.

Academic Projects

Enhancing Wi-Fi Coverage: Boosting Signal Strength and Connectivity ([view details](#))

Data communication and networks

Tools: Cico Packet Tracing

- Enhance Wi-Fi coverage using a compatible Wi-Fi router
- Optimize router placement for maximum signal propagation
- Configure router settings for optimal performance
- Conduct thorough testing to ensure extended coverage effectiveness

My SQL Database Creation: Car Parking System ([view details](#))

Database Project

Tools: MySQL

- Ensure the database satisfies 1NF, 2NF, and 3NF
- Create and configure tables for users, parking, roles, invoices, payments, etc.
- Populate tables with sample data for users, parking slots, roles, etc.
- Implement views for simplified data access

- Perform transactions with commit and rollback for data integrity
- Execute advanced SQL queries including joins and aggregate functions

Leadership & Activities

Leetcode Enthusiast

- Solved 50+ algorithm and data structure problems.

Member, TCS Society

Jan 2022 – Present

- Organized workshops and seminars, enhancing member learning experiences.

General Secretary, TGM University Society

Sep 2023 – Present

- Organized events for 50+ students, increasing participation by 30%.
